

European Society for Gynaecological Endoscopy

ESGE

Webinar

2nd APRIL 2026

LIVE

Navigating the Pelvis:

Functional Anatomy for Endometriosis, Oncology and Urogynecological Surgery

MODERATORS

ERTAN SARIDOGAN (UK)
PRESIDENT
ESGE

GRIGORIS GRIMBIZIS (GR)
CHAIR, ESGE BOARD
OF DIRECTORS

LINA ANTOUN (UK)
ESGE SIG CHAIR
EDUCATION AND TRAINING

HÉLDER FERREIRA (PT)

EDUCATION AND TRAINING

SPEAKERS

HÉLDER FERREIRA (PT)

MOHAMED MABROUK (IT)

BENOIT RABISCHONG (FR)

ATENAS ALEKSANROV (BG)

GABRIELA CENTINI (IT)

RAMON ROVIRA (ES)

Duration: 90 minutes

Format: Live webinar with expert lectures and interactive discussion

Target audience: Gynaecologic surgeons, fellows, residents, and GESEA trainees

02 APRIL 2026

ESGE

Webinar
2nd APRIL 2026

Navigating the Pelvis:

Functional Anatomy for Endometriosis,
Oncology and Urogynecological Surgery

SYNOPSIS

Master the map before you make the move. This high-impact webinar brings pelvic anatomy to life through a surgical lens, revealing the key landmarks, spaces, and nerve pathways that define safe and effective surgery in endometriosis, oncology, and urogynecology.

With expert insights and practical operative tips, discover how to navigate distorted anatomy, refine your dissection strategies, and operate with greater precision and confidence. Designed for advanced surgeons looking to elevate their practice and optimise patient outcomes.

PROGRAMME

19:00 – 19:05 CET

Welcome & Introduction

- Importance of functional pelvic anatomy in minimally invasive gynecologic surgery
- Understanding pelvic anatomy through surgical pathology
- Learning objectives of the webinar

European
Society for
Gynaecological
Endoscopy

ESGE

Webinar
2nd APRIL 2026

Navigating the Pelvis:

Functional Anatomy for Endometriosis,
Oncology and Urogynecological Surgery

19:05 – 19:20 CET | SESSION 1

Functional Anatomy of Deep Endometriosis: Navigating the Posterior Compartment

Prof. Hélder Ferreira (Portugal)

- Posterior pelvic compartment anatomy
- Rectovaginal and pararectal spaces
- Ureteral pathway and ureterolysis strategies
- Nerve preservation during deep endometriosis surgery
- Surgical orientation in distorted anatomy

19:20 – 19:35 CET | SESSION 2

Retroperitoneal Spaces and Surgical Dissection

Prof. Mohamed Mabrouk (Italy)

- Paravesical and pararectal spaces
- Retroperitoneal anatomy relevant to pelvic surgery
- Identification of ureter and uterine artery
- Strategies for safe dissection in complex cases

19:35 – 19:50 CET | SESSION 3

Pelvic Nerve Anatomy and Nerve-Sparing Surgery

Prof. Benoit Rabischong (France) & Atanas Aleksandrov (Bulgaria)

- Hypogastric nerves and inferior hypogastric plexus
- Functional pelvic neuroanatomy
- Bladder, bowel and sexual function
- Nerve-sparing principles in pelvic surgery

Endoscopy

ESGE

Webinar

2nd APRIL 2026

LIVE

Navigating the Pelvis:

Functional Anatomy for Endometriosis,
Oncology and Urogynecological Surgery

19:50 – 20:05 CET | SESSION 4

Pelvic Support Structures and Functional Anatomy in Urogynecology

Dr. Gabrielle Centini (Italy)

- Pelvic support anatomy (Levels I–III)
- Ligaments and fascial planes
- Anatomical basis of pelvic organ prolapse
- Surgical landmarks for sacrocolpopexy

20:05 – 20:15 CET | SESSION 5

Pelvic Vascular Anatomy in Gynecologic Oncology

Dr. Ramon Rovira (Spain)

- Internal iliac artery system
- Parametrial vascular anatomy
- Key vascular landmarks in oncologic surgery (SLN)
- Strategies to avoid vascular complications

20:15 – 20:30 CET

Panel Discussion & Live Q&A

All faculty

- Anatomical pitfalls in pelvic surgery
- Managing distorted anatomy in complex disease
- Training future surgeons in pelvic anatomy
- Audience questions
