## Unveiling Müllerian anomalies: advances in hysteroscopic diagnosis and treatment

### SYNOPSIS

*This webinar, organized by the ESGE Special Interest Group on Hysteroscopy, aims to provide a comprehensive update on the latest advances in the diagnosis and treatment of Müllerian anomalies through hysteroscopy. Expert speakers will cover a wide range of topics, from the evolution of classification systems to the latest surgical techniques, and offer a critical review of the literature surrounding these complex conditions. This event is designed for gynecologists, reproductive specialists, and all healthcare professionals interested in enhancing their understanding of these complex conditions and improving patient care through innovative diagnostic and therapeutic approaches.*

### PROGRAMME

**19:00 – 19:05 CET**

**Welcome & Introduction**

**19:05 – 19:20 CET**

**Classifying the complexity: evolution and updates in Müllerian anomaly classifications**

**Grigoris Grimbizis (Greece)**
